Ainvo Uninstall Manager is a small software application developed specifically for helping you remove installed programs from your computer in order to gain some extra space on the disk and get rid of the clutter. Plain looks The tool does not impress much in the visual department. It reveals a plain interface that shows a few hints about its capabilities. A help manual is not available, but you can decode the configuration settings in a short amount of time because they are easy to work with. Uninstall programs Ainvo Uninstall Manager offers you the possibility to scan your computer for installed utilities. At the end of the process, it displays the total number of installed items. In order to gain access to the list with the installed tools, you need to click on the 'Remove programs' button. You are offered the freedom to uninstall multiple utilities at the same time by selecting the target items from the list. It offers information about each item in the list, namely details about the name, developer, and version. Aside from removing applications, you can also delete registry entries left by other programs in your system. What's more, Ainvo Uninstall Manager lets you generate HTML reports with all the items installed on the computer and provides data about the name, internal name, uninstall path, publisher, and version. Tests have shown that the tool carries out the uninstall process quickly. However, when it comes to deleting registry entries, we have come across several errors. On the downside, Ainvo Uninstall Manager does not create a list with the registry entries for the selected item so it's impossible to check what it actually deletes. Final remarks To sum things up, Ainvo Uninstall Manager has to offer nothing more than a simplistic approach for helping you get rid of multiple applications at the same time. However, it needs functionality improvements until it can be called a reliable program.
