Where I live in the United States, I got an email on how to do system requirements for ArcGIS Server. It was something that I didn't research before, but I'm glad I found your website. babealay 0c557b5cc83 One more question: Are all these systems updated to the same version of ArcGIS Server? I am so new to ArcGIS! Thanks!! Emily i am using ArcMap on a virtualbox virtual machi. 05/07/2022. . Reply. babealay arclighthub. Do you have a screenshot of what the process looks like in ArcMap? What software are you using to drive ArcGIS Server? 19th 3/25/2022. . dontposthere . A: Looking at your question, I

---

would say that the general principles apply. Create a solution, map project, workspace, etc. in ArcCatalog. Use that to create a document template for a user. Just save the template and add it to the library for them. When they open a project it will select a template and use it. If they open the ArcMap.dmp, etc, it will use their template. It is a single database maintained for every individual user, so if they delete their template, they can't get their data back until they uninstall their application. Q: Bash script using awk in while loop I am trying to write a script in bash which first searches for the existence of a file with specific name, in specific folder. If the file is not found it will start looking in another folder. my script is :  
/dir/fileName /dir/fileName /dir/fileName File not found /dir/fileName /dir/fileName /dir/fileName If I understand the script correctly, the while loop should terminate after

---

finding a "file not found" string and exit the loop. So my problem is, that the while loop is not exited, it continues to search for the string "file not found" The script is as follows: while IFS= read -r -n 1 file; do if [ -f "\$file" ]; then
