This game is divided into the following sections: basic information, game description, authors, comments and extras. Basic information: Category: Puzzle Games Developer: Stardust Dev Studio Genre: Puzzle Date Released: 1/10/13 Platform: Windows 7 Price: Free Game description: You see a white horizontal line, a black vertical line, and a white square. Your task is to connect the black vertical line with the white horizontal line and then remove the black vertical line from the board. But don't go in too close: you have to leave the white square as it is. The square has a special ability – it can appear in any position. So you have to find the one that is suitable to your puzzle, and that is the only one to remove. Play and find out! Authors: The game was created by Maksim Rychlodtskiy, a well-known computer programmer in Russia. The developer's comments: "I am still amused by all those games where the player has to use the keyboard to finish an impossible task. I have just released Pocazuca. I decided to try a new type of the game, which is based on the ability to look at game from different angles. In order to create the test puzzles I have collected all my old papers that had too much pixels and I just added some new puzzles from my collection. I hope that you have as much fun playing them as I had doing them." We thank

I was thinking a lot about the hilarious "I'm going to kill you" ending in Mega Man 9 and was wondering if there was a way to recreate the effect. Specifically, I am referring to the scene when Rush and the Final Robot come to blows (click for youtube link): The thing I want to do is disable all the enemies on the screen and have Rush beam weapons at them until they all die (like you would with an old-school raygun). Anyone know how I could do this? A: Depending on your 3D graphics hardware, your best bet is to use something like Photoshop and rotate it or skew it from the normal direction of the beam. If you have a game like Unreal Engine and can use their built in level editor then you have a chance. If you're using something else like Unity or even a 2D game, chances are that you have the native ability to do this through the game engine's Physics. However, I think that Ray Gun
