

1, March 2013 - My laptop ran the Autocom CDP+ version without any problems. but: JJKLPR hardware key is used. and serial 20418. software CDP = WORKING. I tried it with other dongles and software. I downloaded the software, I used the keys, but I noticed that I need to disable the hardware key feature. On the Internet, I found that this feature ("activated/deactivated") is disabled based on the JJKLPR dongle that is connected to the computer. I tried disabling the hardware key feature.
